1	LS	The Work includes the construction of a pump station to allow the decommissioning of the existing wastewater treatment plant. Decommissioning the existing treatment plant will not be started until the pump station is operational. Then the work will consist of converting the existing clarifiers into stormwater holding basins, draining the existing oxidation ditch, removal of the sludge in the existing oxidation ditch, breaking the bottom of the oxidation ditch basin into pieces no larger than 2' x 2', removing the top 2 foot of the basin and island and backfilling the hole left from the oxidation ditch to the grades shown on the plans with compacted soil. Other site work will consist of backfilling the sludge drying bed basins, providing a new electrical supply and distribution system, grading, aggregate paving; mechanical and electrical work; miscellaneous demolition work removing existing structures and all other associated work.	1,272,700.00	\$1,272,700.00	1,279,000.00	\$1,279,000.00	1,338,250.00	\$1,338,250.00	1,392,000.00	\$1,392,000.00	1,579,000.00	\$1,579,000.00	1,681,000.00	\$1,681,000.00
