

**CITY OF CAMERON
MARSHALL COUNTY, WEST VIRGINIA**

PROPOSED WATER SYSTEM IMPROVEMENTS – PHASE III

ADDENDUM # 1

**DECEMBER 7, 2020
THRASHER PROJECT NO. 101-020-1583**

TO WHOM IT MAY CONCERN:

A non-mandatory Pre-Bid Conference was held at 10:00 AM on Tuesday, December 1, 2020 for the above-referenced project. A copy of the notes from that meeting and the sign-in sheet are enclosed with this Addendum.

The following are clarifications and responses to questions provided prior to the conference, at the conference, and after the conference until the close of questions on Friday, December 4, 2020.

Attention is directed to the fact that while information provided in this Addendum may reference specific locations in the plans and specifications, the information provided shall be applied to all applicable locations in the plans and specifications.

Please acknowledge receipt of all Addenda in the Bid Opening Requirements and the Bid Form.

CLARIFICATIONS:

1. **The Bid Opening time has been changed. Bids will be received by the City of Cameron, 44 Main Street, Cameron, Marshall County, West Virginia, until 10:00 A.M., LPT, on Wednesday, December 16, 2020. The bids will be publicly opened and read aloud at that time.**
2. A.C. Wiethe from Belomar Regional Council has provided the Section 3 Regulations and their Pre-Bid Meeting notes that have been included in this Addendum #1.

QUESTIONS AND RESPONSES:

QUESTION

1. What is the Engineer's Estimate?

RESPONSE

The Engineer's Estimate is \$645,000.00.

QUESTION

2. Is there a 90-day bid hold?

RESPONSE

In accordance with EJCDC C-111 Document, the AFB states the Bidder may not withdraw his Bid for a period of 90 days after the date set for the opening of bids.

QUESTION

3. Are there liquidated damages for this project?

RESPONSE

In accordance with EJCDC C-111 Document, the AFB states Liquidated Damages shall be \$1,000 per day.

QUESTION

4. Are weather days available for the project?

RESPONSE

The Supplemental General Conditions include "Attachment D" that is to be filled out and included with every pay request. An adverse weather day will be defined as a day when there is 0.1" of precipitation or more or when the average daily temperature does not reach 32 degrees. Back up information will have to be provided from the National Weather Service based on the Wheeling location and can be found at the following location: <http://www.nws.noaa.gov/climate/index.php?wfo=lwx>. There are 4 anticipated weather days per month. Weather Days requested will be the total number of days in the month, meeting the above requirements, minus 4 anticipated days.

QUESTION

5. Is there retainage that will be held on the project?

RESPONSE

In accordance with the Agreement in the IJCDC C-520 document, Article 6.02 states 10% retainage will be held until substantial completion.

QUESTION

6. Will there be a complete electrical drawing package issued?

RESPONSE

The drawings and specifications provided are sufficient for the small amount of electrical work required. It is the Engineer's intent that the Contractor may reuse the existing conduit from the control building to the existing overflow metering manhole and from the existing control building to the influent metering manhole as shown on Plan Sheet 8. Per

project specification number 407223 Part 2; the design manufacturer is VEGA (VEGA Americas, Inc.) and substitutions shall be accepted provided they meet Project Specifications including Section 016000 requirements.

Available drawings indicate the conduit is 1" steel conduit as shown on Plan Sheet D2. The Contractor is responsible for providing wiring per the latest edition of NEC and the manufacturer's recommendations.

The design supplier of the VEGAPULS 21 sensor recommends the VEGAMET842 controller. A wiring plan provided by the manufacturer has been included with this addendum. The design supplier has recommended Belden 8760 18 AWG 1 pair foil shield cable and a minimum 18 AWG THHN cable for 120V power wire.

QUESTION

7. Can a cable/conduit schedule be provided for specified new cable installation called out in documents? Cable type, size, estimated lengths, insulation type/rating, etc.

RESPONSE

See response to Question Number 6. The Contractor is responsible for estimating lengths and providing a cable type, size, insulation type/rating, etc. per the manufacturer's recommendations. The Conduit Layout drawing from the original supplier has been included with this addendum.

QUESTION

8. Are there any owner or engineering installation specifics/standards for conduit, conduit fittings, cable install, motor terminations, control wiring terminations, and junction box types?

RESPONSE

See response to Question Number 6. The Conduit Layout drawing from the original supplier has been included with this addendum.

QUESTION

9. Can a complete BOM and drawing be provided for the Control Panel Upgrade?

RESPONSE

The Control Panel Upgrade is to be performed by Sanitaire. The Engineer has worked with the plant's original supplier, Kappe Associates, Inc., to determine what Control Panel upgrades are necessary. An equipment and service description from the supplier has been included with this addendum. This Bid Item is an allowance.

QUESTION

10. Can a complete BOM, drawing, and/or specification be provided for Decanter actuator VFD, limit and control upgrade?

RESPONSE

The intent of this Work is to replace the existing pulsing operated decanter actuator with a VFD controlled decanter actuator. It is the Engineer's intent that the Contractor reuse the existing wiring and install the VFD controlled actuator in place of the existing pulsing

operated decanter actuator. The Decanter wiring schematic for Basin #1 and Basin #2, and Process Piping and Instrumentation Diagram from the original supplier has been included with this addendum.

QUESTION

11. Can a complete BOM, drawing, and/or specification be provided for the Chart Recording equipment upgrade?

RESPONSE

There is a Bid Item to remove and replace the existing chart recording equipment with a new controller. Per the Project Specifications the controller shall be compatible with the level sensor and installed per manufacturer's recommendations. A wiring plan for the VEGAMET 842 controller has been included with this addendum.

QUESTION

12. Are all new control panels remotely independent in operation or will they be connected to a central control server via network communications? If panels will be connected via network communications, what will the means of communication be?

RESPONSE

The Control Panel Upgrade (allowance) includes a PLC CPU and HMI upgrade that will include an EWON Webport for remote access however the Site does not currently have internet access.

The local decanter control panel and DO sensor control panel will be connected to the ABJ/Sanitaire control panel as they are currently connected. The bar screen will continue to operate independently.

QUESTION

13. Will a rescue team need to be provided for flow meter and chart recorder install inside of manholes? If yes, does it need to be a 3rd party company?

RESPONSE

The Contractor is responsible for performing all work in a safe and responsible manner. The Thrasher Group, Inc., on behalf of the City of Cameron, does not dictate the means and methods with which a Contractor may use to perform the Work and as such cannot require the Contractor to provide a rescue team for any work performed under this Contract. The Contractor is required to follow all applicable codes and safety standards particularly related to confined spaces and working in sanitary sewer manholes.

QUESTION

14. What are the timelines for outages on each piece of electrical equipment to be replaced? Also, are there specific sequence in which they should be replaced?

RESPONSE

The Engineer has not defined a specific sequence for equipment replacement. The Contractor is responsible for coordinating work with the Owner and supplier(s) to limit down-time.

Per Kappe Associates, Inc. the Control Panel Upgrades are estimated to take approximately 5 hours; however, up to two (2) days of manual operation should be anticipated if needed.

The plant headworks may remain in its current operating state during construction as the mechanical bar screen is currently inoperable.

If you have any additional questions regarding this project, please contact Steve Haynes at 304-288-4441 (mobile), 304-326-6131 (direct), (304) 624-7831 (fax), or shaynes@thethrashergroup.com. As a reminder, bids will be received until 10:00 A.M., LPT, on Wednesday, December 16, 2020 at 44 Main Street, Cameron, Marshall County, WV. Good luck to everyone and thank you for your interest in the project.

Sincerely,
THE THRASHER GROUP, INC.

PRE-BID CONFERENCE AGENDA NOTES

Tuesday, December 1, 2020

PROJECT LOCATION:	Marshall County, West Virginia
ENGINEER'S PROJECT #:	101-020-1583
DATE OF CONFERENCE:	Tuesday, December 1, 2020 at 10:00 A.M., LPT
CONFERENCE LOCATION:	City of Cameron 44 Main Street Cameron, WV 26033

PRE-BID CONFERENCE NOTES

I. Introductions

The attached sign-in sheet documents all attendees.

II. General Project Description

The project was generally described as per the Advertisement for Bids.

III. General Bidding Information

- a. General – **The Bid Opening time has been changed. Bids are due to the City of Cameron by 10:00 A.M., LPT, on Wednesday, December 16, 2020. The bids will be publicly opened and read aloud at that time.**
- b. Bid Opening Requirements – Described as per the blue sheets in the Contract Documents and Detailed Specifications. A.C. Wiethe at Belomar Regional Council can be contacted with questions in regard to the Bid Opening Requirements at (304) 242-1800.
- c. Bid Form – Described as per the yellow sheets in the Contract Documents and Detailed Specifications. Randy Watson provided an explanation on how to fill out the Bid form.
- d. Method of Award – Contingent upon sufficient funding for the project, the Owner may elect to award the contract to the lowest qualified Bidder on the basis of the total bid. If sufficient funding is not available to award the contract on the total bid, Deductive Alternates will be subtracted in numerical order in the contract to produce the lowest bid within the funds available for financing.

IV. Details of Project

- a. Construction Sequence of Events – Described as per the Index Sheet in the Plans.
- b. Material and Equipment – A general description was provided as per the Bid Forms. Thrasher worked with Paul Alfery of Kappe Associates in regards to the plant equipment and Brian Meredith of C2G Engineering with the flow monitoring equipment.
- c. Prevailing Wages – Federal Davis-Bacon Wage Rates are required for this project.

- V. Submittals – Required for all materials used for the project as per Specification Sections 013300. Provide six (6) copies of all submittals. Three will be returned to the contractor, and one copy each to the Owner, RPR and Engineer.
- VI. Permits – All required permits have been applied for by the owner and received.
 - a. The City has paid all cost associated with obtaining the permits including the DOH inspection fees.
- VII. B & O Taxes/Building Permits –
 - a. All work on the project is subject to a 2% Business and Occupation tax that is required to be paid to the City of Cameron. Even though the WWTP is outside of the city limits, it is city owned property and subject to B&O taxes. Monthly B&O Tax payments shall be made to the City of Cameron, based on the previous month's pay estimate. Final Payment will not be released until all B&O taxes are paid.
 - b. The contractor is required to obtain a Business License at a cost of \$6.50.
- VIII. Office Trailer and Equipment, Storage Area, and Disposal Area
 - a. An office trailer is not required for the RPR of this project. Thrasher will work out a suitable location with the city for a place for the RPR to complete their work.
 - b. The Contractor is responsible for securing their own office trailer, storage and disposal areas. The contractor shall notify the engineer of all proposed disposal areas so they can be included in the modification to the storm water permit.
- IX. Addressing Questions – All questions shall be written and provided to Steve Haynes via email at shaynes@thethrashergroup.com. The close of questions shall be 12:00 noon on Friday, December 4, 2020. All answers shall be provided in writing via Addenda.
- X. Addendum – At least one (1) Addendum will be written and supplied to all plan holders. Any and all Addenda shall be acknowledged by the Contractor on Page BOR-21 as well as Article 3.01 on the Bid Form.
- XI. Funding Agency – SCBG - Not Present
- XII. Project Administrator – A.C. Wiethe of Belomar Regional Council.
 - a. Mr. Wiethe provided the Engineer the Section 3 Requirements that are included in the Addendum.

XIII. Owner – The following information was described by the Owner:

- a. Mayor Galentine confirmed that a 2% B&O Tax is required for all work on this project.
- b. The Contractor shall provide accurate red-lined record/as-built drawings. These drawings shall be updated each day and shall be provided to the Owner as part of project close-out.

XIV. Questions and Answers – Questions are included in the Addendum.

XV. Site Visit – Tim Reynolds, City of Cameron, was made available to visit the plant site.

Sincerely,

THE THRASHER GROUP, INC.

STEVE HAYNES, EI

Enclosures – Pre-Bid Sign-in Sheet

City of Cameron – Sewer System Improvements
Pre-Bid Meeting Notes

- Project is being funded by a Small Cities Block Grant from the West Virginia Development Office. This is federal HUD money, so all federal regulations will apply.
- Labor Compliance
 - Davis-Bacon Wage Rates apply. The wage rates are in the bid documents. Wage rates will be checked prior to the bid opening and conveyed to potential bidders via an addendum.
 - Contractor will complete a form listing all expected labor classifications, wage rates, and fringe benefits prior to work beginning. This is submitted to me for review and approval.
 - Contractor will provide one original certified payroll to me on US DOL Form 347, or acceptable substitute. Payrolls begin the first week of work as number one, and continue until the end of work, marked the number and final. Any weeks in which no work takes place, are turned in and marked "No Work".
 - Employee wage interviews will be done during the construction phase. Frequency of the interviews will depend on the expected length of the project, but will be at least monthly. Contractors are required to allow workers to stop their work and be interviewed by the compliance officer. The interview takes approximately five minutes per worker.
- Payments
 - All Pay Requisitions will be submitted to Thrasher for review and approval. They will forward to me. I will prepare the necessary paperwork to present to the City of Cameron Council (monthly meetings). Once approved, it is forwarded to the State for payment. It is important to submit pay requisitions timely to receive payments timely.
- Section 3
 - Section 3 is a requirement of all SCBG projects, and must be taken seriously.
 - City of Cameron (grantee) is required to ensure compliance of Section 3, and meeting numerical goals. All documentation must be forwarded to Belomar Regional Council (Project Administrator).
 - All contractors will seek Section 3 residents (or low or very low income) persons residing in Marshall County, WV for 30% of all new hires as follows:
 - 30% of the aggregate number of new hires in the fiscal year.
 - All contractors will seek Section 3 business to achieve goals as follows:
 - 10% of the total dollar amount of all contracts.
 - Contractors will certify their willingness to comply with Section 3 requirements using the Section 3 Certification form in the bid package (Attachment 6-5A and 6-5D).
 - Bidders are required to provide an estimated number of work force needs on the "Estimated Work Force Needs Table". This includes the approximate number of employee and training positions that are required in the execution of the contract. Bidder also certifies that all good-faith efforts will be made to employ lower income residents as employees and trainees to the greatest extent possible.

City of Cameron – Sewer System Improvements
Pre-Bid Meeting Notes

- Section 3 Businesses (defined by 51% or more owned by Section 3 residents, and 30% of the employees are Section 3).
 - Each contractor shall set forth the approximate dollar value of sub-contractors to be awarded the eligible businesses within each category over the duration of the project.
- Reporting Requirements
 - Contractor shall report on a monthly basis the results of efforts undertaken. Include the usage of Section 3 residents as trainees and skilled employees.
- Required Notifications
 - Each contractor and sub-contractor seeking to establish that a good-faith effort has been made to fill trainee and skilled labor positions with low income residents shall:
 - Attempt to recruit through advertising.
 - Place signs at the proposed job site, community organization within the project area, courthouse, local housing authority, and the local Workforce West Virginia office.
 - Maintain a list of all lower income residents who have applied either on their own or on referral, and employ such person if otherwise eligible, and/or qualified, if a vacancy exists. If no vacancy exists, the applicant shall be considered for the first available opening.
 - Any vacancies that are filled immediately prior to undertaking work shall provide evidence that actions were not an attempt to circumvent the regulations.
 - Obtain self-certification forms for Section 3 hires, and copy these to the administrator.

Equal Employment Opportunity (Attachment 6-5C in Bid Documents)

- Please review the document and Special Equal Opportunity Provisions along with the Goals for Minority Participation: 2.4% and Female Participation: 6.9%

SECTION 3 BUSINESS CERTIFICATION

SECTION 3 BUSINESS CERTIFICATION

The undersigned bidder/contractor certifies as part of its bid or contract that it is a section 3 business as indicated below (check applicable box):

☐ Category 1 Business: A business that is owned 51% or more by Section 3 Residents.

☐ Category 2 Business: A business whose current full time employees, either temporary, seasonal or permanent, consist of at least 30% Section 3 Residents or whose current permanent, full time employees were Section 3 Residents when they were first hired and the period from the date they were first hired to the date of certification does not exceed three (3) years.

A Section 3 resident is defined as any low or very low income person residing within Marshall County. Low income is defined at 80% of the area median income based on family size.

Family Size Maximum Income

1 \$38,600	5 \$59,550
2 \$44,100	6 \$63,950
3 \$49,600	7 \$68,350
4 \$55,100	8 \$72,250

☐ Category 3 Business: A business that provides sufficient evidence to assure a commitment to subcontract more than 25% of the total dollar amount of all subcontracts to Section 3 Businesses.

☐ Is not a Section 3 Business.

Business Name: _____

Business Address: _____

Certifying Signature: _____

Date: _____

Affidavit:

By submitting this application, I affirm that the facts set forth in it are true and complete. I understand that if I am accepted as a Section 3 Business, any false statements, omissions, or other misrepresentations made by me on this application may result in immediate contract dismissal and/or debarment from future federally-funded projects. The Undersigned hereby authorizes and requests any person, firm or corporation to furnish any information requested by the City of Cameron in verification of the recitals comprising this _____ day of _____, 20____.

I am interested in: ☐ **Training opportunities** ☐ **Employment Opportunities** ☐ **Both**

I hereby certify to the U.S. Department of Housing and Urban Development (HUD) and to the City of Cameron that all of the information on this form is true and correct. I attest under penalty of perjury that my total household income and household size is as shown above, and that proof of this information may be requested in the future. If found to be inaccurate, I understand that I may be disqualified as an applicant and/or a certified Section 3 individual which may be grounds for termination of training, employment, or contracts that resulted from this certification. I also understand that failure to complete this form completely and accurately may result in other administrative remedies available to HUD. Finally, I authorize the Recipient to include my name on a list of Section 3 Residents seeking employment and to include my contact information so that contractors may contact me.

RE: City of Cameron Wastewater Treatment Plant Upgrades
Sanitaire Proposal #a29867-19

Xylem Water Solutions USA is pleased to present this proposal for the supply and startup for an ICEAS® controls system upgrade at the Cameron Wastewater Treatment Plant. By upgrading the electrical hardware of the control system, the plant is taking contingency planning seriously by preventing downtime due to hardware failures. In addition, the new software features of the HMI will allow for greater ease of use of the system through intuitive graphics, alarm prioritization and troubleshooting, electronic O&M manuals, maintenance dashboards and remote connectivity. New control algorithms will increase treatment capacity and/or reduce energy/chemical consumption. An ICEAS® controls upgrade greatly improves your operational efficiency, allowing you to work smarter, not harder.

A. EQUIPMENT AND SERVICE:

OPTION I: CONTROLS UPGRADE

Sanitaire's scope of supply for this project includes the following equipment and services:

Provide a PLC CPU and HMI upgrade that would include the following items

1. Remove the existing PLC rack and replace it with an Allen Bradley CompactLogix. All I/O will be replaced with CompactLogix I/O cards.
2. Provide a new PLC program for the PLC that would include Sanitaire's latest control offerings.
3. Replace the existing HMI with a 15.5" touchscreen Panelview 1000 Plus. The control panel will be modified to fit the new HMI, either with a bezel plate or by cutting the opening bigger, whichever is required.
4. Provide an EWON Webport for plant staff to access system remotely through the internet.

Note: internet access is required to enable the communications features through the webport.

5. Provide a trip (10 days) to commission the new equipment and bring system back online, as well as train the operators on the new control system. This installation would include all equipment that is necessary to upgrade the control system.

6. The installation and wiring of the new PLC is handled by a Sanitaire technician to ensure a fast recovery to automatic operation.
7. Two (2) new storm floats.

5.4 Wiring plan

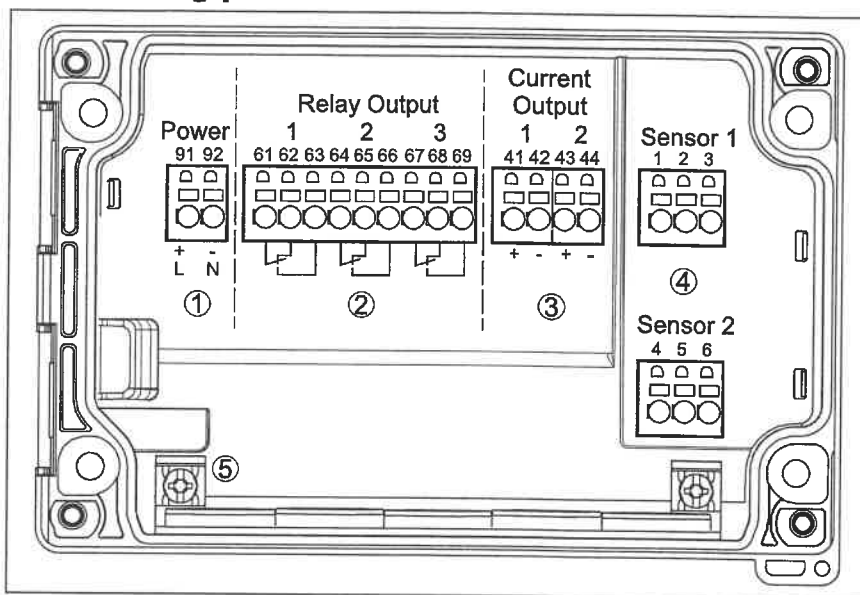

Fig. 6: Wiring plan VEGAMET 842

- 1 Voltage supply of the controller
- 2 Relay outputs 1 ... 3
- 3 Current outputs 1/2
- 4 Sensor inputs (active/passive)
- 5 Ground terminal for protective conductor

Detail sensor connection 1

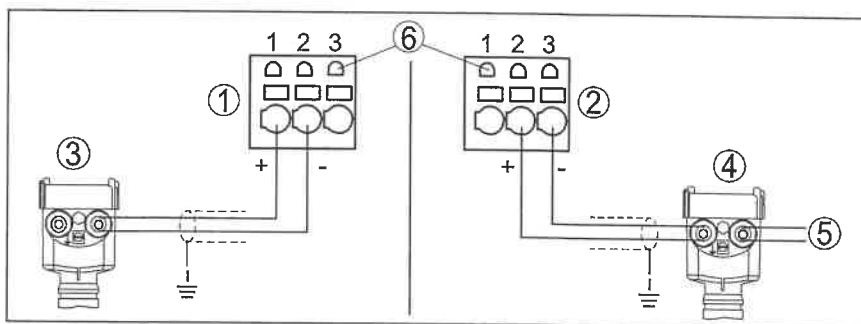

Fig. 7: Sensor input 1 for two-wire/four-wire sensor (active/passive)

- 1 Active input with sensor supply for two-wire sensor
- 2 Passive input without sensor supply for four-wire sensor²⁾
- 3 Two-wire sensor
- 4 Four-wire sensor
- 5 Voltage supply for four-wire sensor
- 6 HART communication sockets for connection of a VEGACONNECT

²⁾ Passive input not available for Ex version

You can find further information on the max. wire cross-section under "*Technical data - Electromechanical data*".

Connecting

Connect the instrument according to the following wiring plan.

5.3 Wiring plan

Electronics and connection compartment

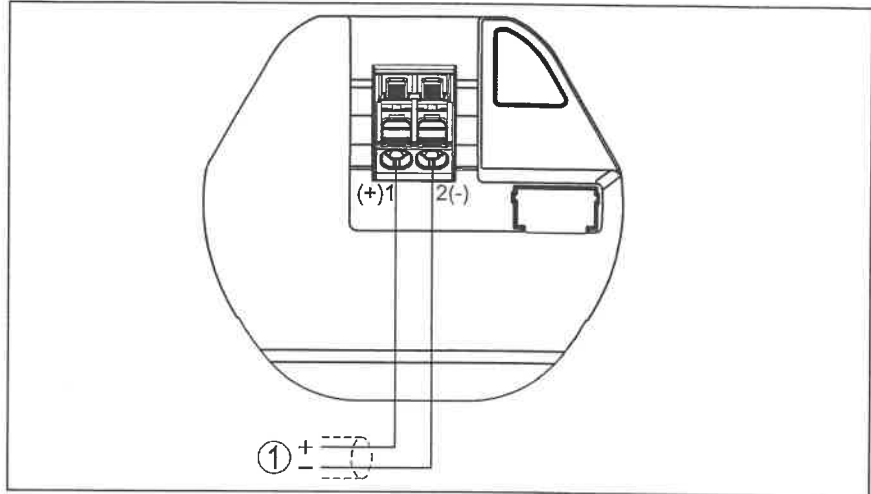

Fig. 18: Connection compartment VEGAPULS 21

1 Voltage supply, signal output

5.4 Switch-on phase

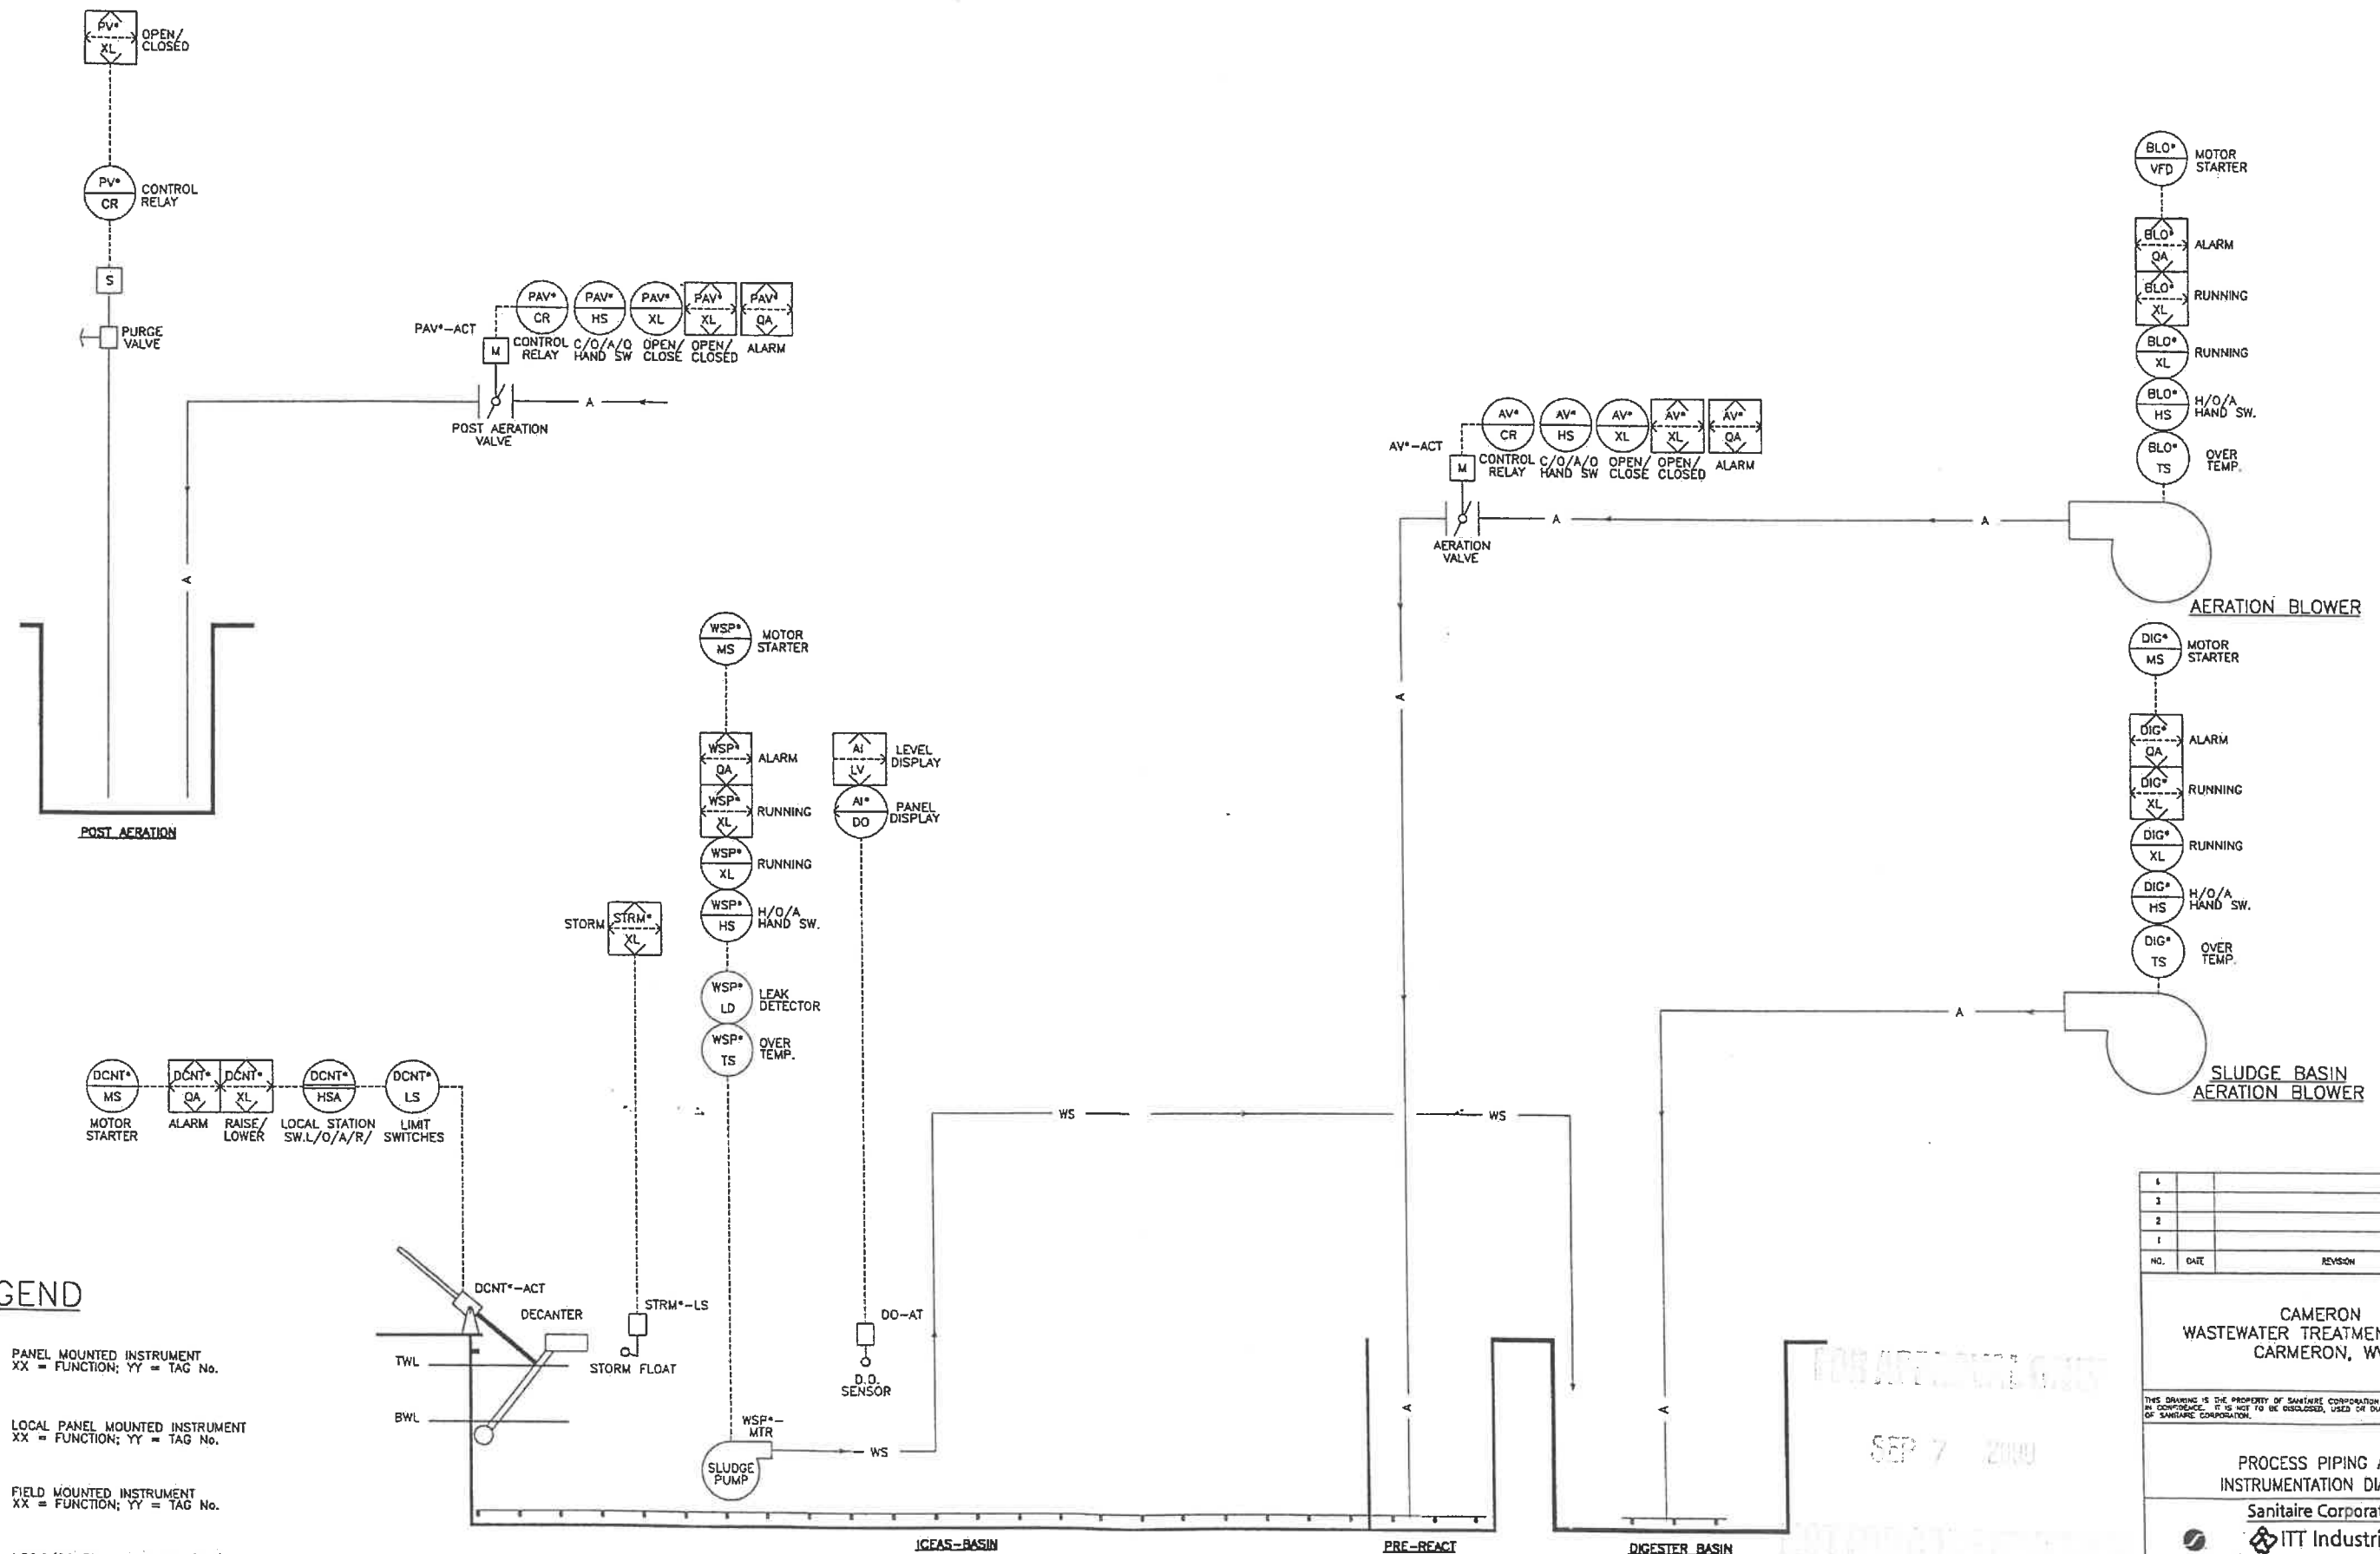

After connection to the power supply, the device carries out a self-test:

- Internal check of the electronics
- Output signal is set to failure

The current measured value is then output on the signal cable.

NOTES

1) * INDICATES A BASIN NUMBER.

LEGEND

- PANEL MOUNTED INSTRUMENT
